

ROOTOLF®

O U T D O O R L I V I N G

## ROOLF-LIVING Designed by Christophe Harinck

As a designer, I am in awe of objects that bring a certain peace of mind. Simple, yet powerful. Designs that go one step beyond beauty and function and aim to conquer hearts and minds. Why not create a sense of joy, of longing? Those are the designs that I aim for.

Having spent two decades refining my craft, I am now proud of having taken it a step further. The Roolf Living indoor/outdoor collection of rugs and furniture adds a typical Bo-Ho feel to high-quality, budget-friendly and eye-catching design meant to deliver instant happiness. Take your time. Own it. It's yours.

“Roolf-Living brings an elegant and playful touch to your space. We design and produce products with a colorful, unique and sustainable texture to spice up your outdoor and indoor life. Our products are your ticket to living your Roolf moments: they invite you to chill and socialize, where and how you want.”

**Sustainability** is an integral part of our company culture. At every step of our production process, we strive to minimize our environmental impact and make a positive contribution to our planet:

**1. recyclable materials:**

Our covers are made from 100% polypropylene, a fully recyclable material. We aim to maximize the use of sustainable materials and minimize the impact of our products at the end of their lifecycle.

**2. recycled fillings:**

The polyurethane flakes used to fill our poufs are made from recycled materials. By using recycled fillings, we reduce the demand for new raw materials and decrease the amount of waste ending up in landfills.

**3. fabric leftovers repurposed into ROOLF shoppers:**

We utilize the leftover fabrics from our production process to create reusable shoppers. This not only minimizes waste but also provides our customers with a practical and sustainable alternative to single-use plastic bags.

**4. waste management:**

We are committed to minimizing our waste and maximizing recycling. All cardboard we use is recycled by specialized cardboard recycling companies. Additionally, our textile waste after weaving is collected and recycled, further reducing our environmental impact.

**5. water usage:**

As we weave fabrics, we minimize our water usage and strive for efficient resource utilization. Through advanced production methods, we aim to reduce the amount of water needed for our processes while maintaining the quality of our products.

**6. installation of solar panels:**

We have invested in the installation of solar panels at our facilities, reducing our reliance on traditional energy sources and harnessing renewable energy for our production processes.

**7. stringent supplier control:**

We take responsibility for ensuring that our supply chain meets strict sustainability standards. Our yarns are sourced from certified factories, with a commitment to ethical and environmentally friendly production methods.

At our company, it's not just about delivering high-quality products and a comfortable experience for our customers, but also about striving for sustainability and environmental consciousness.

We are committed to reducing our ecological footprint and making a positive change in the world around us. With this dedication to sustainability, we continue to work towards a better future for our planet and future generations.

**19 reasons why** this outdoor rug & furniture collection is made of our typical Roolf textile with its unique look, its funky feel and its distinctive technical assets. Want some good reasons why you're about to make a smart choice?

**1. strong**

Roolf outdoor furniture and fabrics are made of 100% polyprop. They are meant to withstand the forces of nature.

**2. comfortable**

You need to relax? Here's your answer: the Dotty Pouf, the Love Seat, the Sunbed... they have all been designed with your comfort in mind.

Firm? Yes. But no hard edges, no steel frames. Only loads of softness. Let it go...

**3. easy cleaning**

Outdoor lounge furniture is meant for chilling, not for hours of cleaning. The fabrics we use help you get your priorities straight. Enjoy!

**4. outdoor = indoor**

The Roolf rugs, chairs, seats... are equally perfect for indoor use. Imagine them in your living room, by the fireplace, in the kids' corner... Choose freely.

**5. budget-friendly**

We want to make sure everybody can enjoy the pleasure of outdoor lounging. So we've made this collection very affordable. (The look of exclusivity is a free gift from us to you.)

**6. unique texture**

Whichever colour you choose – and we have many – each of them is made up of at least 3 different shades. Looking at your Roolf lounge set never gets boring, we've made sure of that.

**7. dry quick**

All Roolf poufs are infused with premium quick dry foam of superior quality combined with a portion of EPS granulate for a soft and luxurious seating experience.

Quick Dry Foam dries almost instantly and contains modern silver additives that fight bacteria and fungus. So you get comfort and super-fast drying in one!

**8. buddies with the sun**

Each and every item in the Roolf collection has been UV-treated, which means all those beautiful colours will keep their wonderful appearance. Let the sun shine, ladies and gentlemen. (And in case you want extra protection, we've got it covered: just ask for our handy **UV-protector spray**.)

**9. lightweight**

Had enough sun? Want to move to the shade, or vice versa? Just pick up your lounge set and go sit where you want to. There's nothing to it.

**10. happy floater**

Yes, the Dotty Pouf even floats. There's a bit of magic to it. Just say abracadabra and go sit on water.

**11. too stiff or not too stiff**

Do I feel too stiff? Solved in a jiffy! Just take out one or more of the high-quality EPS-granulate pads we've put in for that very reason: you're the boss when it comes to deciding how your pouf should feel. Don't throw the pads away, though. That way, you can put them back whenever you wish. (And you can always buy a refill pack.)

**12. safety zipper**

Don't want your kids or pets to accidentally open your pouf? That makes two of us. So we've made sure to equip them with a safety zipper. Impossible to open without a funky little keychain we're happy to provide you with.

**13. be your own architect**

Release your inner artist and arrange your outdoor lounge furniture any way you want. All models are totally modular (what's in a word?) So go ahead and combine them to your heart's content.

**14. urban space**

We don't all have a spacious garden to enjoy those happy Roolf-moments in. And that's just fine. If you're the proud owner of a cosy patio or a wooden deck, know that Roolf is the perfect fit for you as well. We wouldn't have it any other way.

**15. looks matter**

Outdoor living is our kind of living. To us, it means letting things go. Take a seat, see what happens. The look of our lounge range reflects just that. Some call it vintage. Others call it bohemian. We call it cool. Your rugs, chairs, seats, sunbeds... all come in many colours and in many shapes. Together, they form your own world of lounge. Prepare for a unique look with many feels and embrace that special state of mind: chillax.

**16. made in Belgium**

Flemish textile is world-renowned. This is a label we carry with pride.

**17. red dot design award**

This we also carry with pride: the Dotty Pouf has won the prestigious Red Dot Design Award 2018 for its original design. ([www.red-dot.org](http://www.red-dot.org))

**18. IMO certification**

AHOY there! Get on board and let your worries about furniture on a ship be thrown overboard! We are proud to say that Roolf is seaworthy, thanks to its coveted IMO certification.

**19. fire Retarding**

Our poufs are designed to meet high fire safety standards, having passed both the smouldering cigarette test and the match flame equivalent test in accordance with the IMO 2010 FTP Code Annex 1, Part 8. This ensures enhanced fire resistance for upholstered furniture..

## Hot Dotty

Introducing the Hot Dotty, a revolutionary heated pouf designed to elevate your outdoor living experience. Available exclusively in two models—Dotty Medium and Dotty Extra Large—and two sophisticated colors: Beige and Anthracite. This innovative pouf is not only a stylish addition to your outdoor decor but also a practical solution for staying warm in chilly weather. Powered wirelessly by a rechargeable battery, the Hot Dotty offers two heat settings for your comfort.

In setting 2, it provides a generous 7-8 hours of continuous heat, while setting 3 ensures a cozy 2-3 hours of warmth. The battery conveniently charges in just 2-4 hours, ensuring you spend more time enjoying the heat rather than waiting for it.

Experience the ultimate in warmth with Hot Dotty, as it targets and warms the essential organs in the body, creating an intense feeling of coziness. Perfect for extending your outdoor gatherings during colder seasons, Hot Dotty is your go-to solution for a comfortable and warm ambiance. In light of impending bans on traditional patio heaters, Hot Dotty offers an eco-friendly and cost-effective alternative.

We've calculated that businesses, especially in the catering industry, could save up to 80% on energy costs by opting for heated seats like Hot Dotty instead of traditional patio heaters.

Make a sustainable choice for your outdoor heating needs and embrace the warmth with Hot Dotty.

## Dotty Protector

### Wintering outside?

The Dotty furniture from Roolf Living is made of 100% polyprop and is perfect for outdoor use. If you not only want to keep your garden furniture clean but also extend its lifespan, use our Dotty protector. It offers simple but effective protection against wind and weather so that your garden furniture continues to shine year after year. You can use it for overwintering, but comes also in handy during our changeable in-between seasons.

A protective cover... so many advantages

- Extends the service life
- Protects against weather conditions
- Protects against dirt & moisture
- Protects against Mold & fungus

The protectors are available for these Dotty models:

- Round pouf Ø 50
- Round pouf Ø 70
- Small
- Medium
- Club Corner medium
- Extra Large
- Club Corner XL
- Long Chair
- Love Seat

A good protective cover should protect but at the same time prevent suffocation, otherwise your furniture will go mouldy. The protector has a water-repellent outer layer and a breathable inner layer.

The protective cover is custom-made and completely encloses your dottys. It can be closed with simple velcro fasteners and a zip at the back. The grip at the top makes lifting very easy.

Side Table	
Weight	2,5 kg

Teak is the ultimate wood for outdoor furniture, known for its strength, beauty, and natural resistance to weather, pests, and mold. At Roolf Outdoor Living, we use only mature teak from the finest plantations in Indonesia, harvested responsibly to meet strict environmental standards.

Our European-led team in Semarang ensures quality control throughout the year, maximizing efficiency and minimizing waste. Thanks to its high oil content and low moisture absorption, teak offers unmatched durability and stability, making it the perfect choice for timeless outdoor designs.

Overtime, untreated teak develops a beautiful silver-gray patina. To slow this natural aging process, Roolf's UV Protector can be applied, adding hydrophobic protection.

# Roolf Black Edition

One of the challenges of the modern world is the careful use of natural resources. The Roolf Black Edition meets this social requirement to a particularly high degree.

Our luminaires are made of BIO-polyethylene. BIO-polyethylene is a natural product and is made from sugar cane.

By manufacturing our products from renewable raw materials, we not only conserve the finite resources of our planet, we also actively contribute to the reduction of greenhouse gases.

As the sugar cane grows, the plant binds CO<sub>2</sub> from the air. After the sugar cane is harvested, alcohol is formed through fermentation (as in the production of wine), from which polyethylene is then obtained.

No petroleum, no fracking, 100% Roolf Black Edition. In this collection we have

- BE small lamp 60
- BE high lamp 160
- BE ice bucket sitter
- BE coffee table.
